## DETAILED ACTION

### ***Specification***

1. The specification is objected to because the title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed, such as "FILE SYSTEM METADATA DESCRIBING SERVER DIRECTORY STRUCTURE".
2. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-5, 21-38 and 52-62 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Traversat et al., U.S. 6,366,954.

Traversat et al. teach the claimed use of a network directory (*e.g.*, *Figure 2A*) spanning a network (*e.g.*, *Figure 3*) of servers and clients (*wherein client nodes may be*

*entire companies having servers as well, note column 6, lines 45 et seq.) including metadata (i.e., attribute information, note Figures 9A-9C) which may include configuration (i.e., the claimed "at least a portion of" the directory structure, note elements 311 or 303), location for allowing a requestor to locate data (note, e.g., "location:MPK-17" in Figure 9A), and identification information (note Figures 9A-9C) for each server and client in the network, and which may comprise a root directory (note Figure 4) wherein the identifiers may be for disks (note column 15, lines 39 et seq.), i.e., the claimed "disk identifiers" and wherein each server or client may comprise information regarding the directory structure of each other (note column 2, lines 48 et seq., or step 710, or step 808, etc.)*

***Allowable Subject Matter***

5. Claims 6-20 and 39-51 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Peikari whose telephone number is (571) 272-4185.
